

*Grounded in evidence.
Focused on impact.*

PlanKind helps government agencies, public health departments, nonprofits, universities, foundations, and other mission-driven organizations make better decisions through evidence-based planning and practical implementation.

CORE CAPABILITIES

STRATEGY & PLANNING	Strategic, organizational, program, and operational planning; governance support; facilitation.
EVALUATION	Program and impact evaluation; monitoring systems; cost-benefit analysis; logic models and theories of change.
RESEARCH & ANALYTICS	Economic and policy analysis; statistical modeling; GIS; dashboards; forecasting; data visualization.
PROCESS IMPROVEMENT	Workflow redesign; SOPs; automation; reporting systems; performance measurement.
EMERGENCY PREPAREDNESS	Emergency and continuity planning; ICS; exercises; After Action Reports; public health preparedness.

OUR APPROACH

1 • Frame the decision Begin with the choice or outcome that matters.	2 • Build the evidence Use the strongest appropriate mix of data, research, and stakeholder knowledge.	3 • Design for people Make findings understandable and useful to those who must act.
4 • Plan for implementation Translate recommendations into ownership, workflows, and measures.	5 • Leave capacity behind Create maintainable tools, clear documentation, and reusable systems.	The test <i>How does this improve decisions?</i>

EXPERTISE

Economics • Disaster preparedness • Public health • Governance • Energy policy • Program evaluation • Monitoring & Evaluation • Data science • R programming • GIS • Statistical analysis • Academic research
